

111<sup>TH</sup> CONGRESS  
2<sup>D</sup> SESSION

**S.** \_\_\_\_\_

To amend title V of the Elementary and Secondary Education Act of 1965 to award grants to local educational agencies to encourage students, including girls and underrepresented minorities, to pursue studies and careers in science, technology, engineering, and mathematics fields.

---

IN THE SENATE OF THE UNITED STATES

Ms. CANTWELL introduced the following bill; which was read twice and referred to the Committee on \_\_\_\_\_

---

**A BILL**

To amend title V of the Elementary and Secondary Education Act of 1965 to award grants to local educational agencies to encourage students, including girls and underrepresented minorities, to pursue studies and careers in science, technology, engineering, and mathematics fields.

1 *Be it enacted by the Senate and House of Representa-*  
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “21st Century Ignite  
5 STEM Act”.

1 **SEC. 2. GRANTS TO IGNITE YOUTH INTEREST IN SCIENCE,**  
2 **TECHNOLOGY, ENGINEERING, AND MATHE-**  
3 **MATICS.**

4 (a) AMENDMENT.—Title V of the Elementary and  
5 Secondary Education Act of 1965 (20 U.S.C. 7201 et  
6 seq.) is amended by adding at the end the following:

7 **“PART E—PREPARING YOUTH FOR THE 21ST**  
8 **CENTURY**

9 **“SEC. 5901. FINDINGS.**

10 “The Congress finds the following:

11 “(1) 2018 workforce projections by the Depart-  
12 ment of Labor show that 9 of the 10 fastest growing  
13 occupations that require a bachelor’s degree will re-  
14 quire significant scientific or mathematical training.

15 “(2) Women and minorities have historically  
16 been underrepresented in science, technology, engi-  
17 neering, and mathematics occupations.

18 “(3) According to the National Science Founda-  
19 tion, while African Americans account for about 15  
20 percent of the population between the ages of 20  
21 and 24, only about 8 percent of science and engi-  
22 neering degrees are earned by African Americans.

23 “(4) Only 3.8 percent of women pursue the  
24 field of engineering, compared to 18.9 percent of  
25 men.

1           “(5) A combination of factors, including cul-  
2           tural norms, teacher influence, learning environ-  
3           ments, faculty representation, admission and recruit-  
4           ing practices, school performance, employment prac-  
5           tices, and stereotypes, influence underrepresented  
6           minorities’ and women’s decisions to enter science,  
7           technology, engineering, and mathematics occupa-  
8           tions.

9           “(6) According to a recent study, women are  
10          the majority of college students, however, women are  
11          far less likely than their male peers to plan to major  
12          in a science, technology, engineering, or mathematics  
13          field.

14          “(7) According to a recent report, in 2008  
15          women held 57 percent of all professional occupa-  
16          tions in the United States workforce, but only 25  
17          percent of all professional information technology-re-  
18          lated jobs.

19          “(8) A recent study found that technical women  
20          identified isolation and the lack of appropriate  
21          mentorship or sponsorship as one of the key barriers  
22          to the women’s retention and advancement. Forty  
23          percent of technical women reported lacking role  
24          models, while nearly half reported lacking mentors,  
25          and 84 percent reported lacking sponsors or some-

1 one who would help make their accomplishments  
2 visible throughout the organization.

3 “(9) A Washington State-based program  
4 matching secondary school girls with mentors in  
5 technology and fields was successful in increasing  
6 the participation of young women in secondary  
7 school technology classes from less than 1 percent to  
8 40 to 50 percent in 1 school district.

9 “(10) A recent study found that exposing girls  
10 to successful female role models can help counter  
11 negative stereotypes because girls see that people  
12 like them can be successful and stereotypes can be  
13 managed and overcome.

14 **“SEC. 5902. PROGRAM AUTHORITY.**

15 “(a) IN GENERAL.—From funds appropriated under  
16 section 5903 the Secretary is authorized to award grants  
17 to, and enter into contracts or cooperative agreements  
18 with, local educational agencies on behalf of elementary  
19 schools and secondary schools to encourage the ongoing  
20 interest of students, including girls and underrepresented  
21 minorities, in science, technology, engineering, and mathe-  
22 matics and to encourage the interest of girls and under-  
23 represented minorities in pursuing undergraduate and  
24 graduate degrees, or training for careers, in science, tech-  
25 nology, engineering, and mathematics.

1 “(b) APPLICATION.—

2 “(1) IN GENERAL.—To be eligible to receive a  
3 grant, or enter into a contract or cooperative agree-  
4 ment under this part, a local educational agency  
5 shall submit an application to the Secretary at such  
6 time, in such form, and containing such information  
7 as the Secretary may reasonably require.

8 “(2) CONTENTS.—The application referred to  
9 in paragraph (1) shall contain, at a minimum, the  
10 following:

11 “(A) A specific description of the program  
12 to be assisted under the grant, contract, or co-  
13 operative agreement, including the content of  
14 the program and the research and models used  
15 to design the program.

16 “(B) A description of—

17 “(i) the collaboration between elemen-  
18 tary schools and secondary schools to fulfill  
19 the goals of the program; and

20 “(ii) how the local educational agency  
21 will ensure that there is a comprehensive  
22 plan to improve science, technology, engi-  
23 neering, and mathematics education for  
24 students, including girls and underrep-

1           “(1) Acquainting and preparing students, in-  
2           cluding girls and underrepresented minorities, with  
3           careers in science, technology, engineering, and  
4           mathematics, and with the advantages of pursuing  
5           careers in such fields.

6           “(2) Educating the parents and caregivers of  
7           girls and underrepresented minorities about the ad-  
8           vantages of careers in science, technology, engineer-  
9           ing, and mathematics and about the difficulties  
10          faced by girls and underrepresented minorities in  
11          maintaining an interest and desire to achieve in  
12          science, technology, engineering, and mathematics,  
13          and enlisting the help of the parents and caregivers  
14          in overcoming the difficulties.

15          “(3) Providing tutoring in science, technology,  
16          engineering, and mathematics.

17          “(4) Mentoring relationships, which may be in-  
18          person or through the Internet.

19          “(5) Paying the costs of students and their  
20          teachers to attend events and academic programs in  
21          science, technology, engineering, and mathematics.

22          “(6) Providing after-school activities designed  
23          to encourage the interest of students, including girls  
24          and underrepresented minorities, in science, tech-  
25          nology, engineering, and mathematics.

1           “(7) Summer programs designed to encourage  
2 interest, and develop skills, in science, technology,  
3 engineering, and mathematics.

4           “(8)(A) Purchasing educational instructional  
5 materials designed to encourage interest in science,  
6 technology, engineering, and mathematics.

7           “(B) Developing and drafting timely and inno-  
8 vative curriculum and materials to encourage inter-  
9 est in science, technology, engineering, and mathe-  
10 matics.

11           “(C) Purchasing equipment, instrumentation,  
12 or hardware used for teaching and encouraging the  
13 interest of students, including girls and underrep-  
14 resented minorities, in science, technology, engineer-  
15 ing, and mathematics.

16           “(9) Field trips to locations, including institu-  
17 tions of higher education, vocational facilities, and  
18 corporations, to educate and encourage the interest  
19 of students, including girls and underrepresented mi-  
20 norities, in science, technology, engineering, and  
21 mathematics.

22           “(10) Purchasing and disseminating informa-  
23 tion to parents and caregivers of students, including  
24 girls and underrepresented minorities, that will help  
25 the parents and caregivers to encourage their stu-

1       dent’s interest in science, technology, engineering,  
2       and mathematics.

3               “(11) Paying not more than 50 percent of the  
4       cost of an internship in science, technology, engi-  
5       neering, and mathematics, with priority given to  
6       those internships at local and regional institutions,  
7       corporations, or organizations.

8               “(12) Paying not more than 50 percent of the  
9       cost of an internship in science, technology, engi-  
10       neering, and mathematics for female and underrep-  
11       resented minority students.

12               “(13) Providing professional development for  
13       teachers, including—

14                       “(A) how to eliminate gender and racial  
15       bias in the classroom;

16                       “(B) how to be sensitive to gender and ra-  
17       cial differences;

18                       “(C) how to be sensitive to different learn-  
19       ing styles, how to adapt lesson plans to those  
20       who learn science, technology, engineering, and  
21       mathematics through visual learning, and how  
22       to encourage the use of nontraditional teaching  
23       methods;

1           “(D) how to engage students in the face of  
2 gender-based and racial peer pressure and pa-  
3 rental expectations;

4           “(E) how to use social media and other  
5 forms of media and innovation to encourage in-  
6 terest in science, technology, engineering, and  
7 mathematics;

8           “(F) how to create and maintain a positive  
9 environment; and

10           “(G) how to encourage girls and underrep-  
11 resented minorities, through academic advice  
12 and assistance, to pursue advanced classes, cer-  
13 tification, job training, or careers in science,  
14 technology, engineering, and mathematics  
15 fields.

16           “(d) SUPPLEMENT, NOT SUPPLANT.—The Secretary  
17 shall require each local educational agency that receives  
18 assistance under this section to use the assistance only  
19 to supplement, and not to supplant, any other assistance  
20 or funds made available from Federal and non-Federal  
21 sources for the activities assisted under this section.

22           “(e) EVALUATIONS.—Each local educational agency  
23 that receives funds under this part shall provide the Sec-  
24 retary, at the conclusion of every school year during which

1 the funds are received, with an evaluation, in a form pre-  
2 scribed by the Secretary. The evaluation shall include—

3 “(1) a description of the programs and activi-  
4 ties conducted by the local educational agency using  
5 the funds;

6 “(2) data on curriculum and partnerships devel-  
7 oped using the funds;

8 “(3) data on the amount of time spent on sub-  
9 jects permitted under the grant, contract, or cooper-  
10 ative agreement; and

11 “(4) such other information as may be required  
12 by the Secretary.

13 **“SEC. 5903. AUTHORIZATION OF APPROPRIATIONS.**

14 “There are authorized to be appropriated to carry out  
15 this part \$50,000,000 for fiscal year 2011, and such sums  
16 as may be necessary for each of the 4 succeeding fiscal  
17 years.”.

18 (b) TABLE OF CONTENTS.—The table of contents in  
19 section 2 of the Elementary and Secondary Education Act  
20 of 1965 is amended by inserting after the item relating  
21 to section 5618 the following:

“PART E—PREPARING YOUTH FOR THE 21ST CENTURY

“Sec. 5901. Findings.

“Sec. 5902. Program authority.

“Sec. 5903. Authorization of appropriations.”.
