

COLLABORATIVE SPONSORSHIP CAREER LAUNCH

IGNITE EMPOWERS TOMORROW'S INNOVATORS.

Career Launch is a 12-week mentorship program designed to connect young women and gender-diverse students who are 18 and older with experienced STEM professionals. Through hands-on guidance, networking opportunities, and a supportive community, participants gain the skills, confidence, and connections they need to pursue meaningful careers in STEM.

By supporting Career Launch, sponsors help remove barriers to opportunity, foster the next generation of innovators, and make a lasting impact on workforce development in STEM fields.

COLLABORATIVE PROGRAM SPONSORSHIP

This program expands student access to mentorship and job shadowing while providing career readiness tools and job placement pathways. Your organization can directly support students by offering meaningful mentorship opportunities through employee engagement.

Visionary Sponsor

- Exclusive program naming rights for an academic year
- Access to a unique and collaborative workforce development pipeline
- Press release announcing sponsorship

- Logo or name displayed alongside community and funding partners
- All Connector level benefits

Connector Sponsor

- Social media shoutout on all of IGNITE's platforms
- Access to a dedicated community of STEM industry leaders

About IGNITE Worldwide

IGNITE Worldwide is the answer to achieving gender equity in STEM. We work directly with educators during the school day to provide accessible programming that promotes STEM education and career advancement for girls, young women, and gender-diverse students, helping them recognize new possibilities for their futures.

WHY IGNITE CAREER LAUNCH?

"I'm exploring software development and cybersecurity—fields that let me combine my love for solving problems with the opportunity to create and build.

IGNITE didn't just help me find a career path. It helped me find confidence, community, and purpose. I know firsthand how vital this program is—not just for girls like me, but for the future of the tech industry itself."
